**Police Courts in Nineteenth-Century Scotland, Volume 1** Sep 19 2019 Taking the form of two companion volumes, Police Courts in Nineteenth-Century Scotland represents the first major investigation into the administration, experience, impact and representation of summary justice in Scottish towns, c.1800 to 1892. Each volume explores diverse, but complementary, themes relating to judicial practices, relationships, experiences and discourses through the lens of the same subject matter: the police court. Volume 1, with the subtitle Magistrates, Media and the Masses, provides an institutional, social and cultural history of the establishment, development and practice of police courts. It explores their rise, purpose and internal workings, and how justice was administered and

experienced by those who attended them in a variety of roles. Special attention is given to examining how courtroom discourse was represented in print culture, the role of the media in providing a discursive commentary on summary justice, and the ways in which magistrates and the police engaged in a law and order dialogue with the press. Throughout, consideration is given to uncovering the relationship between magistrates, the courts, the police and the wider community, and to charting the implications of the rise of summary justice and the 'police-man' state for the urban masses (as evidenced through prosecution, conviction and punishment patterns). Volume 2, with the subtitle *Boundaries, Behaviours and Bodies*, explores, through themed case studies, how police courts shaped conceptual, spatial, temporal and commercial boundaries by regulating every-day activities, pastimes and cultures.

**The Formation of the Nazi Constituency 1919-1933 (RLE Nazi Germany & Holocaust)** Jun 09 2021 In the years preceding publication of this book in 1986 much progress was made in identifying the social sources of support for Hitler's NSDAP and in determining the tactics employed by the party to mobilise its constituency at grass roots level. It has emerged that the Nazi's roots were far more diverse than previously assumed, extending beyond the lower middle class to encompass both the affluent bourgeoisie and the working class. This book collects together original studies which represent a distillation of some of the contemporaneous research.

The Political Economy and Media Coverage of the European Economic Crisis Jan 24 2020 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent, it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light, even if the latter's aim has been to shift the burden of adjustment onto citizens. This book explains how and why, using a critical political economic perspective and focusing on the case of Ireland. Throughout, Ireland is compared with contemporary and historical examples to contextualise the arguments made. The book covers the housing bubble that led to the crash, the rescue of financial institutions by the state, the role of the European institutions and the International Monetary Fund, austerity, and the possibility of leaving the eurozone for Europe's peripheral countries. Through a systematic analysis of Ireland's main newspapers, it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis.

*Newcomers No More? Contemporary NATO and the Future of the Enlargement from the Perspective of "Post-Cold War" Members* Mar 06 2021 The central aims of the book is to present, in the form of a collection of papers, a variety of views on NATO from member states "formerly known as new", and to assess in this context the prospects for NATO enlargement. Therefore, the book consists of two parts. The main objective of the first part is to present how NATO is now perceived in Central and South-Eastern Europe. Papers collected here offer an opportunity to reflect on the impact of the enlargements starting from 1999 on NATO functioning and evolution, roles, tasks and capabilities. The issue of how accession has transformed accessioning states will also be discussed. Last but not least, the perspective of "new" members on NATO's future will be presented. The authors of the articles in this part mainly come from those countries that joined the Alliance after the end of the Cold War. The second part is devoted strictly to the topic of enlargement. In this part we asked experts from NATO members (both "old" and "new"), potential candidates and other NATO partners (including Russia, Georgia, Ukraine, Azerbaijan, Sweden, Finland etc.) how they view the future of NATO cooperation with external partners in Europe and the prospects for enlargement of the Alliance.

*"There She Is, Miss America"* Mar 18 2022 While some see the Miss American Pageant as hokey vestige of another era, many remain enthralled by the annual Atlantic City event. And whether you love it or hate it, no one can deny the impact the contest has had on American popular culture-indeed, many reality television shows seem to have taken cues from the pageant. Founded in 1921, the Miss America Pageant has provided a fascinating glimpse into how American standards of femininity have been defined, projected, maintained, and challenged. At various times, it has been praised as a positive role model for

young American women, protested as degrading to women by feminists, and shamed by scandals, such as the one caused by the Penthouse photos of Vanessa Williams in 1984. In this first interdisciplinary anthology to examine this uniquely American event, scholars defend, critique, and reflect on the pageant, grappling with themes like beauty, race, the body, identity, kitsch, and consumerism. "There She Is, Miss America" provides a fascinating examination of an enduring American icon.

**The View Across the River** Jul 22 2022 This is a paperback edition of a 2001 book combining biography and larger historical narrative. Guy (history, U. of Natal, South Africa) studies the life of the daughter of the Bishop of Natal, Hariette Colenso, as a window into the continuing process of imperialism and colonialism after the destruction of the Zulu Kingdom's political hierarchy. After the military defeat of the Zulus, the invaders turned their attention to diverting Zululand's productive capacity and material wealth to the benefit of the colonizers; but a number of women and men, including Colenso, resisted this exploitation. Guy argues that an examination of her interaction with the Zulus should be viewed as a contribution to understanding the complicated role of women in the world of late-19th-century imperialism. **A Perilous Progress** Oct 21 2019 The economics profession in twentieth-century America began as a humble quest to understand the "wealth of nations." It grew into a profession of immense public prestige--and now suffers a strangely withered public purpose. Michael Bernstein portrays a profession that has ended up repudiating the state that nurtured it, ignoring distributive justice, and disproportionately privileging private desires in the study of economic life. Intellectual introversion has robbed it, he contends, of the very public influence it coveted and cultivated for so long. With wit and irony he examines how a community of experts now identified with uncritical celebration of "free market" virtues was itself shaped, dramatically so, by government and collective action. In arresting and provocative detail Bernstein describes economists' fitful efforts to sway a state apparatus where values and goals could seldom remain separate from means and technique, and how their vocation was ultimately humbled by government itself. Replete with novel research findings, his work also analyzes the historical peculiarities that led the profession to a key role in the contemporary backlash against federal initiatives dating from the 1930s to reform the nation's economic and social life. Interestingly enough, scholars have largely overlooked the history that has shaped this profession. An economist by training, Bernstein brings a historian's sensibilities to his narrative, utilizing extensive archival research to reveal unspoken presumptions that, through the agency of economists themselves, have come to mold and define, and sometimes actually deform, public discourse. This book offers important, even troubling insights to readers interested in the modern economic and political history of the United States and perplexed by recent trends in public policy debate. It also complements a growing literature on the history of the social sciences. Sure to have a lasting impact on its field, *A Perilous Progress* represents an extraordinary contribution of gritty empirical research and conceptual boldness, of grand narrative breadth and profound analytical depth.

**Toward the Health of a Nation** May 08 2021 Canadians view their healthcare – recognized throughout the world as an exemplary system – as iconic and integral to their identity. In *Toward the Health of a Nation* Leslie Boehm recounts the first seventy years in the life of one of the foundations of Canada's healthcare system, the Institute of Health Policy, Management and Evaluation at the University of Toronto. Boehm – a graduate of IHPME, and an instructor there throughout his career – charts the institute's history from its inception in 1947 as the Department of Hospital Administration to the present day. The first program of its kind in Canada, and one of the few in the world, the school was founded at a time when the issue of healthcare was becoming a significant part of national and provincial discussions and policies. Initially concentrating on hospital management and professional degrees, it has expanded to offer academic

degrees and facilitate important research into health systems, policies, and outcomes. In *Toward the Health of a Nation* Boehm demonstrates the excellence of the program, its faculty, and its graduates, as well as their accomplishments in major government initiatives and royal commissions. In the seventy years since IHPME's inception healthcare has grown to become a major part of government and business activity, and it will only increase in coming years. An in-depth history of a major program in graduate health education, *Toward the Health of a Nation* highlights how important healthcare is to a modern, functional society. *Dispute Settlement Reports 2018: Volume 8, Pages 3923 and 4796* Jul 30 2020 The Dispute Settlement Reports are the WTO authorized and paginated reports in English. **Politics and Finance in the European Union** Aug 11 2021 The recent financial and sovereign debt crisis, while turning the spotlight into the degenerating effects of modern-day capitalism, has engendered a series of hard-to-control events that are severely testing the stability of the European institutions. The adjustments, to date, have proved unable to adequately tackle the financial turmoil that is undermining the construction of the EU. Hence the need to identify the reasons behind this situation, which is accompanied by the failure to achieve an osmosis between the member countries of the Union. The objective to be pursued is clarifying the uncertainties and contradictions within Europe, for the purpose of addressing what many see as a "systemic crisis".

**Enchantments** Aug 19 2019 The first major work to examine Joseph Cornell's relationship to American modernism Joseph Cornell (1903–1972) is best known for his exquisite and alluring box constructions, in which he transformed found objects—such as celestial charts, glass ice cubes, and feathers—into enchanted worlds that blur the boundaries between fantasy and the commonplace. Situating Cornell within the broader artistic, cultural, and political debates of midcentury America, this innovative and interdisciplinary account reveals enchantment's relevance to the history of American modernism. In this beautifully illustrated book, Marci Kwon explores Cornell's attempts to convey enchantment—an ephemeral experience that exceeds rational explanation—in material form. Examining his box constructions, graphic design projects, and cinematic experiments, she shows how he turned to formal strategies drawn from movements like Transcendentalism and Romanticism to figure the immaterial. Kwon provides new perspectives on Cornell's artistic and graphic design career, bringing vividly to life a wide circle of acquaintances that included artists, poets, writers, and filmmakers such as Mina Loy, Lincoln Kirstein, Frank O'Hara, and Stan Brakhage. Cornell's participation in these varied milieus elucidates enchantment's centrality to midcentury conversations about art's potential for power and moral authority, and reveals how enchantment and modernity came to be understood as opposing forces. Leading contemporary artists such as

Betye Saar and Carolee Schneemann turned to Cornell's enchantment as a resource for their own anti-racist, feminist projects. Spanning four decades of the artist's career, Enchantments sheds critical light on Cornell's engagement with many key episodes in American modernism, from Abstract Expressionism, 1930s "folk art," and the emergence of New York School poetry and experimental cinema to the transatlantic migration of Symbolism, Surrealism, and ballet. **SI VIS PACEM, PARA UTIQUE PACEM** Jul 18 2019 Analyses of the international security environment typically provide somber overviews of the various drivers and manifestations of conflict and instability around the world. Recent developments such as the terrorist attacks in Paris, Beirut and elsewhere, a Middle East in flames, a resurgent Russia, incessant violence in West Africa or turmoil in South China Sea only reinforce this view. By framing our analysis of the security environment in these terms, debates about how to anticipate and respond to these current and future threats invariably focus on those forces of instability and conflict: how to identify threats and enemies and then eliminate them. This report is based on the premise that this conflict-centric mindset has led to portfolio choices in terms of strategies ('what do we do and how do we do it?'), capabilities ('what do we do it with?'), and partners ('who do we do it with?') that have been excessively one-sided. This report argues that there is an alternative, complementary way of framing security that is equally real and equally actionable for defense and security organizations (DSOs<sup>4</sup>): a resilience-centric one.

By investigating how these new forms alter the dynamics of spectatorship, this book charts how cinema's affective capacities have shifted in relation to these modifications in the forms of cinematic horror. It applies a rich theoretical synthesis of phenomenological and Deleuzian approaches to a number of case studies, including films like *The Blair Witch Project*, *Paranormal Activity* and *Creep* as well as video games such as *Alien: Isolation* and new media forms such as Youtube horror and virtual reality horror.

**Germany and the Second World War** Mar 26 2020 This is the second in the comprehensive ten-volume *Germany and the Second World War*. The five volumes so far published in German take the story to the end of 1941, and have achieved international acclaim as a major contribution to historical study. Under the auspices of the *Militärgeschichtliches Forschungsamt* (Research Institute for Military History), a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War. This volume surveys the first year of the war deliberately begun by Nazi Germany. The authors examine the train of interconnected political and military events, and set military operations against the background of Hitler's war policy and general aims, both immediate and long term. The authors show that the conflict took a course quite different from that which Hitler had intended, but nevertheless resulted in a series of conquests for the Third Reich.

**The Law Against War** Aug 31 2020 Praise for previous edition: "...a comprehensive, meticulously-researched study of contemporary international law governing the use of armed force in international relations..." Andrew Garwood-Gowers, *Queensland University of Technology Law Review*, Volume 12(2) When this first English language edition of *The Law Against War* published it quickly established itself as a classic. Detailed, analytically rigorous and comprehensive, it provided an indispensable guide to the legal framework regulating the use of force. Now a decade on the much anticipated new edition brings the work up to date. It looks at new precedents arising from the Arab Spring; the struggle against the "Islamic State" in Iraq and Syria; and the conflicts in Ukraine and Yemen. It also reflects the new doctrinal debates surrounding recent state practice. Previous positions are reconsidered and in some cases revised, notably the question of consensual intervention and the very definition of force, particularly, to accommodate targeted extrajudicial executions and

cyber-operations. Finally, the new edition provides detailed coverage of the concept of self-defense, reflecting recent interpretations of the International Court of Justice and the ongoing controversies surrounding its definition and interpretation.

**Crisis in the Eurozone** Feb 17 2022 First, there was the credit crunch, and governments around the world stepped in to bail out the banks. The sequel to that debacle is the sovereign debt crisis, which has hit the eurozone hard. The hour has come to pay the piper, and ordinary citizens across Europe are growing to realize that socialism for the wealthy means punching a few new holes in their already-tightened belts. Building on his work as a leading member of the renowned Research on Money and Finance group, Costas Lapavistas argues that European austerity is counterproductive. Cutbacks in public spending will mean a longer, deeper recession, worsen the burden of debt, further imperil banks, and may soon spell the end of monetary union itself. Crisis in the Eurozone charts a cautious path between political economy and radical economics to envisage a restructuring reliant on the forces of organized labour and civil society. The clear-headed rationalism at the heart of this book conveys a controversial message, unwelcome in many quarters but soon to be echoed across the continent: impoverished states have to quit the euro and cut their losses or worse hardship will ensue.

**Architecture and Resilience** Apr 19 2022 Resilience will be a defining quality of the twenty-first century. As we witness the increasingly turbulent effects of climate change, the multiple challenges of resource depletion and wage stagnation, we know that our current ways of living are not resilient. Our urban infrastructures, our buildings, our economies, our ways of managing and governing are still too tightly bound to models of unrestrained free-market growth, individualism and consumerism. Research has shown that the crises arising from climate change will become increasingly frequent and increasingly severe. It is also known that the effects of climate change are not evenly distributed across places and people, and neither are the resources needed to meet these challenges. We will need specific responses in place that engage with, and emerge from, citizens ourselves. This volume takes resilience as a transformative concept to ask where and what architecture might contribute. Bringing together cross-disciplinary perspectives from architecture, urban design, art, geography, building science and psychoanalysis, it aims to open up multiple perspectives of research, spatial strategies and projects that are testing how we can build local resilience in preparation for major societal challenges, defining the position of architecture in urban resilience discourse.

**Santamaria** Jan 16 2022 B.A. Santamaria was one of the most controversial Australians of our time. An ardent anti-Communist and devout Catholic, he was fiercely intelligent and a natural leader, polarising the community into loyal followers and committed opponents. In the 1940s Santamaria created the anti-Communist organisation 'The Movement'. In the 1950s he was a key figure in the tumultuous split of the Australian Labor Party. He subsequently enjoyed great influence as a public commentator on his television program Point of View and in his weekly column in The Australian. Santamaria had a strong social conscience and spent much of his time helping the underprivileged. Although he began as an advocate and champion of the Catholic Church, he spent much of his last decades opposing some of its activities. Published for the 100th anniversary of Santamaria's birth, Santamaria: A Most Unusual Man is an authoritative biography from Gerard Henderson, a close colleague until a disagreement saw the two men estranged and never reconciled.

**Asian Security and the Rise of China** Dec 23 2019 ÔKhuo, Jones, and Smith have pulled off a remarkable balancing act, crafting a well-grounded and multifaceted survey of China's rise in the context of Asian security. In a field which is often marked more by scholarly effervescence than substance, the authors provide a refreshingly detailed portrait of the last two decades, and fair-mindedly point out evidence which might support both extremes of the debates they challenge with their own Ôthird way.Ô Æ Frank ÔScott Ô Douglas, US Naval War College, US Ô Congratulations to the authors for a clearly argued and comprehensive treatment of China's post Cold War rise and what it means for existing and future dynamics of the Asia-Pacific region. Effectively employing realist theory in a fair-minded treatment of regional developments, the volume shows how and why power realities are more important than non-material factors in determining the region's trajectory and thereby demonstrates that China's ascendance in Asia remains complicated and conflicted.Ô Æ Robert Sutter, George Washington University, US East Asia is without question a region of huge economic, political and security significance. Asian Security and the Rise of China offers a comprehensive overview and assessment of the international politics of the Asia-Pacific since the end of the Cold War, seeking to address the overarching question of how we can most convincingly explain the central dynamics of Asia's international relations. Via a realist perspective on the dynamics and frictions associated with accommodating the rise of powerful states, this timely book addresses the core issue in contemporary Asian politics: the rise of China. The contributors expertly evaluate China's rise and the impact it has had on the dynamics of regional relations in North East and South East Asia. It demonstrates that China's economic development and its regional and international ambition increasingly conflict with the existing consensus-based regional arrangements like the ASEAN Regional Forum and the East Asian Summit mechanism. As a consequence, smaller states in the region increasingly resort to hedging and balancing strategies in an attempt to mitigate Chinese hegemony. This leaves the region in the grip of a complex and potentially destabilizing security dilemma. The book offers a compelling analysis of the problem that China presents for its region that will enlighten undergraduate students of regional political studies and international relations. Postgraduate and Master's students on courses addressing East and South East Asia will also find plenty of information in this invaluable book.
