**South Central Dreams** Aug 19 2021 Race, place, and identity in a changing urban America Over the last five decades, South Los Angeles has undergone a remarkable demographic transition. In South Central Dreams, eminent scholars Pierrette Hondagneu-Sotelo and Manuel Pastor follow its transformation from a historically Black neighborhood into a predominantly Latino one, providing a fresh, inside look at the fascinating—and constantly changing—relationships between these two racial and ethnic groups in California. Drawing on almost two hundred interviews and statistical data, Hondagneu-Sotelo and Pastor explore the experiences of first- and second-generation Latino residents, their long-time Black neighbors, and local civic leaders seeking to build coalitions. Acknowledging early tensions between Black and Brown communities, they show how Latino immigrants settled into a new country and a new neighborhood, finding various ways to co-exist, cooperate, and, most recently, demonstrate Black-Brown solidarity at a time when both racial and ethnic communities have come under threat. Hondagneu-Sotelo and Pastor show how Latino and Black residents have practiced, and adapted innovative strategies of belonging in a historically Black context, ultimately crafting a new route to place-based identity and political representation. South Central Dreams illuminates how racial and ethnic demographic shifts—as well as the search for identity and belonging—are dramatically shaping American cities and neighborhoods around the country.

**American Red Cross Water Safety**

**Instructor's Manual** Nov 02 2022 *Ethics in Mental Health Research* Jan 30 2020 Research holds a key to preventing and effectively treating mental disorders, including ADHD, depression, schizophrenia, and substance abuse. Yet even as research holds out promise, mental health researchers face numerous ethical challenges. Responsible for ensuring participants are able and willing to grant consent, researchers must also constantly protect privacy and confidentiality. But for so many situations, the appropriate decisions are not so clear. An individual with cognitive deficits may have difficulty understanding a research study and granting informed consent, but nevertheless wants to participate. Many studies gather private information about medical records or illegal behaviors that could lead to emotional, social, or legal harm if shared, yet state laws and institutional review boards may require researchers to breach confidentiality in specific situations. Moreover, mental health consumers and other vulnerable research participants are frequently familiar with historical cases of abuse of human subjects, and may be mistrustful of researchers or fear exploitation. At the same time, researchers are often frustrated when they feel that advocates or institutional review boards erect barriers to research, even while failing to enhance the ethical treatment of participants. Ethical research is rarely simply about avoiding bad activities, and more frequently about how to pursue good research when multiple values and commitments conflict. Ethics in Mental Health Research explores how ethical issues arise in mental health research, and offers

concrete guidance to researchers who seek to comply with federal regulations while conducting research that is at once ethical and scientifically credible. Case studies used throughout illustrate a variety of situations and effective problem-solving strategies. This book is essential reading for mental health researchers, IRB members, and research advocates.
