Preparing the Ghost: An Essay Concerning the Giant Squid and Its First Photographer Jul 29 2019 Memory, mythology, and obsession collide in this "slyly charming" (New York Times Book Review) account of the giant squid. In 1874, Moses Harvey--eccentric Newfoundland reverend and amateur naturalist--was the first person to photograph the near-mythic giant squid, draping it over his shower curtain rod to display its magnitude. In Preparing the Ghost, what begins as Harvey's story becomes spectacularly "slippery and many-armed" (NewYorker.com) as Matthew Gavin Frank winds his narrative tentacles around history, creative nonfiction, science, memoir, and meditations about the interrelated nature of them all. In his full-hearted, lyrical style, Frank weaves in playful forays about his trip to Harvey's Newfoundland home, his own childhood and family history, and a catalog of peculiar facts that recall Melville's story of obsession with another deep-sea dwelling leviathan. "Totally original and haunting" (Flavorwire), Preparing the Ghost is a delightfully unpredictable inquiry into the big, beautiful human impulse to obsess.

The Last Giant of Beringia Oct 24 2021 The intriguing theory of a land bridge periodically linking Siberia and Alaska during the coldest pulsations of the Ice Ages had been much debated since Jose de Acosta, a Spanish missionary working in Mexico and Peru, first proposed the idea of a connection between the continents in 1589. But proof of the land bridge - now named Beringia after eighteenth-century Danish explorer Vitus Bering - eluded scientists until an inquiring geologist named Dave Hopkins emerged from rural New England and set himself to the task of solving the mystery. Through the life story of Hopkins, The Last Giant of Beringia reveals the fascinating science detective story that at last confirmed the existence of the land bridge that served as the intercontinental migration route for such massive Ice Age beasts as woolly mammoths, steppe bison, giant stag-moose, dire wolves, short-faced bears, and saber-toothed cats - and for the first humans to enter the New World from Asia. After proving unambiguously that the land bridge existed, Hopkins went on to show that the Beringian landscape cannot have been the "polar desert" that many had claimed, but provided forage enough to sustain a diverse menagerie of Ice Age behemoths.

Lost Race of the Giants Feb 25 2022 An exploration of mythological and archaeological evidence for prehistoric giants • Examines the many corresponding giant mythologies throughout the world, such as the Greek and Roman titans, Norse frost giants, and the biblical Nephilim • Reveals recent finds of giant skeletons in the deserts of Saudi Arabia and India • Explains how giants passed on their sophisticated culture and civilization to humanity before being wiped out in the great age of cataclysms and floods Giants are a cornerstone of the myths, legends, and traditions of almost every culture on Earth. Stories of giants are often considered fantasies of the ancients or primitive attempts to explain natural phenomena, but archaeological discoveries of 10- and 12-foot skeletons--many of which have been suppressed--confirm the existence of a forgotten golden age of giants before recorded history. Patrick Chouinard examines the staggering number of corresponding giant mythologies throughout the world, such as the Greek and Roman titans, Norse frost giants, the Hindu Daityas, the biblical Nephilim, the Celtic Formorach, the Sumerian Anunnaki, and the multitude of myths in which the sky or world is held aloft on the shoulders of a giant. He links these stories to Atlantis as well as other legends of prehistoric civilizations lost to cataclysm and great floods whose survivors spawned the rise of ancient civilizations. The author reveals how physical remains of giant-size peoples have been found on almost every continent, including recent finds in the deserts of Saudi Arabia, Afghanistan, and northern India as well as hundreds of excavations of giant mummies and skeletons across the United States, corresponding directly with Native American accounts of red-haired giants. He also examines reports from famous explorers such as Magellan, Sir Francis Drake, and Desoto of their encounters with giants on the North American continent. Revealing how giants represent the true earthborn race, Chouinard explains how they engaged in open conflict with the extraterrestrial gods who created humanity for forced labor and how they passed their sophisticated culture and civilization on to humanity before being nearly wiped out in the great age of cataclysms.
