User's Guide for the Structured Clinical Interview for Dsm-5 Personality Disorders (Scid-5-Pd) Jul 29 2019 The Structured Clinical Interview for DSM-5 Personality Disorders (SCID-5-PD) is a semistructured diagnostic interview for clinicians and researchers to assess the 10 DSM-5 Personality Disorders across Clusters A, B, and C as well as Other Specified Personality Disorde Designed to build rapport, the SCID-5-PD can be used to make personality disorder diagnoses, either categorically (present or absent) or dimensionally. The SCID-5-PD includes the indispensable User's Guide for the SCID-5-PD, as well as a handy self-report screening questionnaire for patients or subjects, the Structured Clinical Interview for DSM-5® Screening Personality Questionnaire (SCID-5-SPQ). The SCID-5-PD is the updated version of the former Structured Clinical Interview for DSM-IV Axis II Personality Disorders (SCID-II). The SCID-5-PD name reflects the elimination of the multiaxial system in DSM-5. Although the DSM-IV Personality Disorder criteria are unchanged in DSM-5, the SCID-5-PD interview questions have been thoroughly reviewed and revised to optimally capture the construct embodied in the diagnostic criteria. In addition, a dimensional scoring component has been added to the SCID-5-PD. The basic structure of the SCID-5-PD is similar to the other SCID-5 interviews (suc as the Research Version, SCID-5-RV; and the Clinician Version, SCID-5-CV) that cover non--personality DSM-5 disorders. Features include the following: * Questions assessing the DSM-5 criteria for each of the 10 personality disorders: Avoidant Personality Disorder, Dependent Personality Disorder, Obsessive-Compulsive Personality Disorder, Paranoid

Personality Disorder, Schizotypal Personality Disorder, Schizoid Personality Disorder, Histrionic Personality Disorder, Narcissistic Personality Disorder, and Antisocial Personality Disorder.* A User's Guide for the SCID-5-PD containing essential guidance for use of the SCID-5-PD, including an appendix of a completed SCID-5-PD and SCID-5-SPQ for a sample patient.* An optional SCID-5-SPQ that serves as a brief, 20-minute self-report screening tool to reduce the time of the SCID-5-PD clinical interview. The SCID-5-SPQ requires an eighth grade or higher reading level (as determined by the Flesch-Kincaid formula). Its 106 questions correspond directly to each first question in the full SCID-5-PD. The SCID-5-PD can be used in various types of research studies, just as the SCID-II. It has been used to investigate patterns of Personality Disorders co-occurring with other mental disorders or medical conditions; select a group of study subjects with a particular Personality Disorder; investigate the underlying structure of personality pathology; and compare with other assessment methods for Personality Disorders. The SCID-5-PD will serve as a valuable resource to help clinicians and researchers more accurately diagnose Personality Disorders.

A User's Guide to the Brain Feb 13 2021 John Ratey, bestselling author and clinical professor of psychiatry at Harvard Medical School, lucidly explains the human brain's workings, and paves the way for a better understanding of how the brain affects who we are. Ratey provides insight into the basic structure and chemistry of the brain, and demonstrates how its systems shape our perceptions, emotions, and behavior. By giving us a greater understanding of how the brain responds to the guidance of its user, he provides us with knowledge that can enable us to improve our lives. In A User's Guide to the Brain, Ratey clearly and succinctly surveys what scientists now know about the brain and how we use it. He looks at the brain as a malleable organ capable of improvement and change, like any muscle, and examines the way specific motor functions might be applied to overcome neural disorders ranging from everyday shyness to autism. Drawing on examples from his practice and from everyday life, Ratey illustrates that the most important lesson we can learn about our brains is how to use them to their maximum potential.

Risk Nov 24 2021 From the bestselling author of Team of Teams and My Share of the Task, an entirely new way to understand risk and master the unknown. Retired four-star general Stan McChrystal has lived a life associated with the deadly risks of combat. From his first day at We Point, to his years in Afghanistan, to his efforts helping business leaders navigate a global pandemic, McChrystal has seen how individuals and organizations fail to mitigate risk. Why? Because they focus on the probability of something happening instead of the interface by which can be managed. In this new book, General McChrystal offers a battle-tested system for detect and responding to risk. Instead of defining risk as a force to predict, McChrystal and coauthor Anna Butrico show that there are in fact ten dimensions of control we can adjust at any given time. By closely monitoring these controls, we can maintain a healthy Risk Immune System that allows us to effectively anticipate, identify, analyze, and act upon the ever-present possibility t things will not go as planned. Drawing on examples ranging from military history to the busines world, and offering practical exercises to improve preparedness, McChrystal illustrates how the ten factors are always in effect, and how by considering them, individuals and organizations ca exert mastery over every conceivable sort of risk that they might face. We may not be able to the future, but with McChrystal's hard-won guidance, we can improve our resistance and build strong defense against what we know—and what we don't.

A Reference Guide for English Studies Jul 21 2021 This ambitious undertaking is designed to acquaint students, teachers, and researchers with reference sources in any branch of English studies, which Marcuse defines as "all those subjects and lines of critical and scholarly inquiry presently pursued by members of university departments of English language and literature." Within each of 24 major sections, Marcuse lists and annotates bibliographies, guides, reviews o research, encyclopedias, dictionaries, journals, and reference histories. The annotations and various indexes are models of clarity and usefulness, and cross references are liberally supplied where appropriate. Although cost-conscious librarians will probably consider the several other excellent literary bibliographies in print, such as James L. Harner's Literary Research Guide (Modern Language Assn. of America, 1989), larger academic libraries will want Marcuse's volume.-- Jack Bales, Mary Washington Coll. Lib., Fredericksburg, Va. -Library Journal.
