The Patchwork City Jan 30

2020 In contemporary Manila, slums and squatter settlements are peppered throughout the city, often pushing right up against the walled enclaves of the privileged, creating the complex geopolitical pattern of Marco Z. Garrido's "patchwork

city.” Garrido documents the fragmentation of Manila into a mélange of spaces defined by class, particularly slums and upper- and middle-class enclaves. He then looks beyond urban fragmentation to delineate its effects on class relations and politics, arguing that the proliferation of these slums and enclaves and their subsequent proximity have intensified class relations. For enclave residents, the proximity of slums is a source of insecurity, compelling them to impose spatial boundaries on slum residents. For slum residents, the regular imposition of these boundaries creates a pervasive sense of discrimination. Class

boundaries then sharpen along the housing divide, and the urban poor and middle class emerge not as labor and capital but as squatters and “villagers,” Manila’s name for subdivision residents. Garrido further examines the politicization of this divide with the case of the populist president Joseph Estrada, finding the two sides drawn into contention over not just the right to the city, but the nature of democracy itself. The Patchwork City illuminates how segregation, class relations, and democracy are all intensely connected. It makes clear, ultimately, that class as a social structure is as indispensable to the study of Manila—and of

many other cities of the Global South—as race is to the study of American cities.

2020 War has always attracted journalists, such as Ernest Hemingway in the Spanish Civil War or David Halberstam in Vietnam. And war reporting has often been controversial as well as influential, like William Randolph Hearst's "yellow journalism" in the Spanish-American War. But what happens when 24/7 news channels and the Internet make news instantaneous . . . when the public's attention span decreases . . . when political and military leaders employ slick spinmeisters to package the news . . . when reporters lose their objectivity? In this passionate look at how war is reported in the age of Fox News and blogging, Charles

Jones takes readers from the front page to the front lines-- and back again--to explore how the Iraq War has been covered. Along the way he interviews journalists and military leaders--including Jim Lehrer of PBS, Jamie McIntyre of CNN, Rick Atkinson of the Washington Post, Joe Klein of Time, and former Marine Gen. James L. Jones--and describes the conflict between the media, which claims a right to know, and the military, which claims a need for secrecy and security. Jones shows us Geraldo Rivera drawing battle plans in the sand, MSNBC censoring Phil Donahue, and Donald Rumsfeld "oh golly"-ing reporters at the Pentagon and

answers these questions: • Why has public interest in news about Iraq declined since 2003? • Why do most people seem to care more about Britney Spears and Paris Hilton than about the latest casualties in Iraq? And why do many news outlets indulge those preferences? • How does the embedding process work? Has it been successful? • How has the military disseminated information about the war? • To what extent has the Bush administration twisted the facts? • How do reporters balance objectivity and patriotism? • What are the obligations of a journalist in wartime?

the new reality of war. The Marines had planned to slip into Fallujah “as soft as fog.” But after four American contractors were brutally murdered, President Bush ordered an attack on the city—against the advice of the Marines. The assault sparked a political firestorm, and the Marines were forced to withdraw amid controversy and confusion—only to be ordered a second time to take a city that had become an inferno of hate and the lair of the archterrorist al-Zarqawi. Based on months spent with the battalions in Fallujah and hundreds of interviews at every level—senior policymakers, negotiators, generals, and soldiers and

Marines on the front lines—No True Glory is a testament to the bravery of the American soldier and a cautionary tale about the complex—and often costly—interconnected roles of policy, politics, and battle in the twenty-first century. NOTE: This version does not include the photo insert.

Operation Phantom Fury Sep 19 2021 The Second Battle for Fallujah, dubbed Operation Phantom Fury, took place over

an almost two-month period, from November 7 to December 23, 2004. The Marine Corps' biggest battle in Iraq to date, it was so prolonged and fierce that it has entered the pantheon of USMC battles alongside Iwo Jima, Inchon, and Hue City. This book offers an in-depth, intimate look into Operation Phantom Fury, the single most significant battle undertaken during the occupation of Iraq. The author, a retired Marine Corps colonel with combat service in Vietnam, conducted personal interviews with combatants, from the division commander in charge of the operation down to Marine infantrymen who did the fighting.
