Rural Rides Apr 05 2020 Rural Rides is the book for which the English journalist, agriculturist and political reformer William Cobbett is best known. At the time of writing Rural Rides, in the

early 1820s, Cobbett was a radical anti-Corn Law campaigner. He embarked on a series of journeys by horseback through the countryside of Southeast England and the English Midlands. He wrote down what he saw from the points of view both of a farmer and a social reformer. The result documents the early 19th-century countryside and its people as well as giving free vent to Cobbett's opinions

White Fragility Jul 21 2021 The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital,

necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

Emotional Expression and Health Mar 05 2020 Emotional Expression and Health looks at the role emotional expression and inhibition may play in staying healthy or falling ill. Written by leading experts in the field, chapters focus on: * how we can measure emotional expression or inhibition and how we can distinguish between their various facets * the role of attachment, and development of emotional information processing * alexithymia, emotional suppression, deception, emotional disclosure, defensiveness, repression, psychological mindedness, and emotional intelligence and self-efficacy. This unique approach will be of interest to all those in the fields of health and medical psychology and psychiatry, and behavioural medicine, as well

as professionals working with patients in whom emotional expression or inhibition may play a role in a disease's etiology, course, or prognosis.

she is controlled by rigid rules and must wear a cumbersome 17th century habit looking like a flying nun. During 3 years of formation she is stripped of her own identity and forced into a mold. She must give up the family she loves, while her Superiors squash her passion for art, music, and nature. She must live under vows that require blind obedience, no pay for her work, and untainted celibacy. All of these sacrifices are demanded in Gods all-justifying Name. Leaving the convent would be turning her back on God and risking eternal damnation, Superiors say. After reading Pats true story, readers are faced with a question: Was Pat, and thousands of other women like her, abused by the very religion they loved? Emmy-award winning screenwriter and one of Pats mentors, Vickie Patik, says, THE TEARS I COULDNT CRY is a triumph of the human spirit and an inspiration to anyone who is working up the courage to question cherished beliefs and seek closure through honest reflection and self-healing. Barnaby Conrad, co-founder of the Santa Barbara Writers Conference and its co-director for 33 years says that Pat has written her story that is terrifying and beautiful and VERY moving. *Research Paper FPL* Dec 02 2019

[Tears of My Motherland](#) Jun 19 2021 August 1945. The Japanese onslaught on Vietnam and Philippines came to an end. Netaji Subhash Bose's sudden death was a big blow for the Indian diaspora in South East Asia, who were backing him for

their motherland's freedom. Many of them remained in South East Asian countries instead of moving back to India. Two of these countries were Vietnam and the Philippines. The book is a tearful story about the Indian migrants who are still risking everything in their pursuit for a better life. Crossing boundaries and breaking barriers with every generation, their fates are tied to their adopted country's economic and political merry go around. After 75 years, they still ask, where do we belong? You may find an answer in this book.

Trail of Tears Nov 05 2022 A sixth-generation North Carolinian, highly-acclaimed author John Ehle grew up on former Cherokee hunting grounds. His experience as an accomplished novelist, combined with his extensive, meticulous research, culminates in this moving tragedy rich with historical detail. The Cherokee are a proud, ancient civilization. For hundreds of years they believed themselves to be the "Principle People" residing at the center of the earth. But by the 18th century, some of their leaders believed it was necessary to adapt to European ways in order to survive. Those chiefs sealed the fate of their tribes in 1875 when they signed a treaty relinquishing their land east of the Mississippi in return for promises of wealth and better land. The U.S. government used the treaty to justify the eviction of the Cherokee nation in an exodus that the Cherokee will forever remember as the

"trail where they cried." The heroism and nobility of the Cherokee shine through this intricate story of American politics, ambition, and greed. B & W photographs *Thumbs, Toes, and Tears* Jan 27 2022 The fascinating evolutionary links between six seemingly unremarkable traits that make us the very remarkable creatures we are. Countless behaviors separate us from the rest of the animal kingdom, but all of them can be traced one way or another to six traits that are unique to the human race-our big toe, our opposable thumb, our oddly shaped pharynx, and our ability to laugh, kiss, and cry. At first glance these may not seem to be connected but they are. Each marks a fork in the evolutionary road where we went one way and the rest of the animal kingdom went another. Each opens small passageways on the peculiar geography of the human heart and mind. Walter weaves together fascinating insights from complexity theory, the latest brain scanning techniques, anthropology, artificial intelligence, cognitive psychology, and robotics to explore how the smallest of changes over the past six million years - all shaped by the forces of evolution -- have enabled a primate once on the brink of extinction to evolve into a creature that would one day create all of the grand and exuberant edifices of human culture. As the story of each trait unfolds, Walter explains why our brains grew so large and complex, why we find one another sexually attractive,

how toolmaking laid the mental groundwork for language, why we care about what others think, and how we became the creature that laughs and cries and falls in love. Thumbs, Toes and Tears is original, informative, and delightfully thought-provoking.

These renowned authors provide clear and extensive descriptions of their projects, enabling scientists and clinical ophthalmologists to quickly bring themselves up to date with cutting edge research in this field. This overview of research into the pathogenesis and clinical treatment of dry

eye is a must for all ophthalmologists dealing with this syndrome and looking to increase their knowledge base. **Holding Back The Tears** Apr 29 2022 This is true story about real people is set in Edinburgh City and Dundee, where a petite Scottish Lassie called Rosie Gilmour, mother to Finlay Sinclair, receives news of the death of her son - who tragically has taken his own life by hanging. Rosie pretends her son is still alive by talking to him, for that takes away the unbearable pain of her loss. But once she begins to face up to the fact that Finlay is not coming back, her conversations become more of a challenge than she can handle. When memories of her past are triggered by everyday life events, they take her mind back and forth in time - back to her own childhood days in 1960, when she flirted with the fairground boys, and to the day she gave birth to Finlay - "ME LADDIE". Rosie's Scottish accent becomes more apparent whenever her emotions are heightened and she begins to recite poetry. She goes on to reveal doubts about her own self-worth and how she reunites her role as mother - a role she had denied herself for seven years prior to Finlay's death. Rosie learns how to forgive herself and how to accept her loss with using practical coping strategies that sometimes but not always work for her. Many voices of different natures and walks of life appear in Rosie's, story with each one offering a part of their own belief to try and console her in her misery -

except that she turns her back on any advice or support offered. Rosie is convinced that she can cope with her loss on her own and "needs no help from anyone, thank you" - until a sweet, gentle, soft-spoken voice begins to travel with her throughout her ordeal, leaving her no other choice but to listen. Eventually moving to the countryside in Angus, Rosie finds the isolation gives her life a new meaning offering her the opportunity to re-value her beliefs about her own self values and decides the time has come to give her son a memorial service and invite a chosen few dance companions whom she met on a regular basis in Edinburgh to honour this day. Rosie begins to accept she will never be the same person she once had been and shall never be again, believing now her journey through grief taught her many lessons making her a stronger and better person than she imagined she could ever be.

Tears in the Darkness Feb 02 2020 Following the U.S. surrender to the Japanese on the peninsula of Bataan in 1942, 76,000 American and Filipino POWs began the infamous Death March. This gripping narrative, told in unsparing but sympathetic detail, focuses intermittently on American POW Ben Steele, whose sketches adorn the book, and the hell of Japanese prison and labor camps that introduced these captives to the starvation, dehydration and murderous Japanese brutality that would become routine for the next three years.

Tears Oct 31 2019 A Collection of Matt Shaw's heartbreaking dramas Matt Shaw does not just write horror. In fact, when asked what his favourite books are, he often names the tales collected within this set. Stories of heartbreak, loss and grief - all with an element of hope... A hope we often forget when dealing with grief. Contained within this collection Heaven's Calling BOY: Built to Love The Missing Years of Thomas Pritchard (unpublished short story) Alone Heaven's Calling Josh and Holly could face anything thrown at them all the time they had each other. Their love would conquer anything and the world was their oyster. But when a tragic accident tears Josh away from Holly she realises that, without her husband, she cannot cope and her world begins to crumble; her loss being more than she can handle. Until, that is, she receives a phone call. Her late husband. The same time every day; he doesn't appear to know what has happened to him and Holly can't bring herself to tell him. She isn't even sure if it really is him calling or whether it's all in her tormented mind. Especially seeing as the calls only happen when she is alone. Is it all in her head, has she gone mad, or is heaven really calling? Boy: Built to Love No parent should have to bury their own child and yet that was exactly what they had to do. Stillborn; a young boy never to open his eyes to take in the world around him. And now Lucy and Jack's marriage was on the verge of crumbling under the strain of the grief

they struggled to cope with. A grief made worse when the doctors tell them they'll never be able to have a child of their own due to complications from the last pregnancy. But what if it didn't have to be that way? What if there was a way of using science and technology to create a son they could love? What if Jack was able to use Artificial Intelligence to create A Boy: Built to Love? Is the answer to their problems to be found within the world of science-fiction or are they setting themselves up for yet more grief and sadness? The Missing Years of Thomas Pritchard August 3rd. 6:03am. The tranquil summer's morning was shattered by the desperate screams of Thomas' mother echoing down the near deserted suburban street. The few people milling about outside getting ready for their daily business had said they couldn't make out what the cries were about when they were interviewed. Not initially. Not until Anne, a pretty woman in her early thirties with shoulder length blonde hair, spilled out onto the street wearing nothing more than her dressing gown and slippers anxiously calling out for her five year old son, Thomas, to come out from wherever he was hiding. Eye witnesses reported Anne was closely followed by her husband Bill - a professional, clean-shaven man in his late thirties with dark, short hair - half dressed for work in his suit trousers and unbuttoned white shirt, and that he too looked just as frantic as the mother did. The year was 2003; the year

Thomas disappeared from his home without a trace. * * * * * August 3rd. 6:03am. A young, fragile looking hand knocked confidently on the white PVC of the front door to number twenty-two. The hand belonged to a smartly dressed, skinny fourteen year old, fresh-faced boy. Whilst waiting for an answer to his knocking he slid a brown leather satchel off his shoulder down onto the floor as though the weight was too much for him to bear any more. He went to knock again but stopped himself when he heard the sound of footsteps from the other side of the door as the freshly woken homeowner came to answer his initial knocking. There was the slightest of pauses as keys were twisted in locks before the door opened as much as the strong, gold, security chain would permit it to. "Can I help you?" asked the homeowner, a frail looking woman in her late sixties. "Where's my mum?" asked the boy. The year was 2012; the year Thomas came home.

Tears of the Desert Oct 24 2021 "[Halima Bashir's] mesmerizing tale of against-all-odds endurance is a piercing lament—and a clear-eyed call to action."—Vogue "This memoir helps keep the Darfur tragedy open as a wound not yet healed."—Elie Wiesel, author of *Night* Born into the Zaghawa tribe in the Sudanese desert, Halima Bashir received

a good education away from her rural surroundings (thanks to her doting, politically astute father) and at twenty-four became her village's first formal doctor. Yet not even Bashir's degree could protect her from the encroaching conflict that would consume her homeland. Janjaweed Arab militias savagely assaulted the Zaghawa, often with the backing of the Sudanese military. Then, in early 2004, the Janjaweed attacked Bashir's village and surrounding areas, raping forty-two schoolgirls and their teachers. Bashir, who treated the traumatized victims, some as young as eight years old, could no longer remain quiet. But breaking her silence ignited a horrifying turn of events. Raw and riveting, *Tears of the Desert* is the first memoir ever written by a woman caught up in the war in Darfur. It is a survivor's tale of a conflicted country, a resilient people, and an uncompromising spirit. Praise for *Tears of the Desert* "This is a brave book. And a valuable one. Halima's story of the atrocities and immeasurable losses she has endured must be told."—Mia Farrow, actor and advocate "Vivid, poignant and brutally candid . . . *Tears of the Desert* is that rarest of literary endeavors, not just a book you read but a book you experience."—The Washington Post Book World "An extraordinary memoir . . . Halima Bashir's bravery contrasts with the world's fecklessness and failures."—Nicholas D. Kristof, *The New York Times* "Searing .

. . *Tears of the Desert* gives voice to the unspeakable."—USA Today "Powerful, harrowing and brave."—The Economist "A luminous tale of growing up in rural Darfur . . . a wonderful and moving African memoir."—The New York Review of Books

The Indian Removal Act Mar 29 2022 Provides a history of the removal of Native Americans from their land by the white Americans, discussing the hardships they faced, and the background of their removal.
White Tears/Brown Scars May 31 2022 Called "powerful and provocative" by Dr. Ibram X. Kendi, author of the New York Times bestselling *How to be an Antiracist*, this explosive book of history and cultural criticism reveals how white feminism has been used as a weapon of white supremacy and patriarchy deployed against Black and Indigenous women, and women of color. Taking us from the slave era, when white women fought in court to keep "ownership" of their slaves, through the centuries of colonialism, when they offered a soft face for brutal tactics, to the modern

workplace, *White Tears/Brown Scars* tells a charged story of white women's active participation in campaigns of oppression. It offers a long overdue validation of the experiences of women of color. Discussing subjects as varied as *The Hunger Games*, Alexandria Ocasio-Cortez, the viral BBQ Becky video, and 19th century lynchings of Mexicans in the American Southwest, Ruby Hamad undertakes a new investigation of gender and race. She shows how the division between innocent white women and racialized, sexualized women of color was created, and why this division is crucial to confront. Along the way, there are revelatory responses to questions like: Why are white men not troubled by sexual assault on women? (See Christine Blasey Ford.) With rigor and precision, Hamad builds a powerful argument about the legacy of white superiority that we are socialized within, a reality that we must apprehend in order to fight. "A stunning and thorough look at White womanhood that should be required reading for anyone who claims to be an intersectional feminist. Hamad's controlled urgency makes the book an illuminating and poignant read. Hamad is a purveyor of such bold thinking, the only question is, are we ready to listen?" —Rosa Boshier, *The Washington Post*

The Topography of Tears Jul 01 2022 Marvelous landscapes of human experience and emotion rendered through the magnification of our tears

The Chemistry of Tears Mar 17

2021 *An automaton*, a man and a woman who can never meet, two stories of love—all are brought to incandescent life in this hauntingly moving novel from one of the finest writers of our time. London 2010: Catherine Gehrig, conservator at the Swinburne museum, learns of the sudden death of her colleague and lover of thirteen years. As the mistress of a married man, she must struggle to keep the depth of her anguish to herself. The one other person who knows Catherine's secret—her boss—arranges for her to be given a special project away from prying eyes in the museum's Annexe. Usually controlled and rational, but now mad with grief, Catherine reluctantly unpacks an extraordinary, eerie automaton that she has been charged with bringing back to life. As she begins to piece together the clockwork puzzle, she also uncovers a series of notebooks written by the mechanical creature's original owner: a nineteenth-century Englishman, Henry Brandling, who traveled to Germany to commission it as a magical amusement for his consumptive son. But it is Catherine, nearly two hundred years later, who will find comfort and wonder in Henry's story. And it is the automaton, in its beautiful, uncanny imitation of life, that will link two strangers confronted with the mysteries of creation, the miracle and catastrophe of human invention, and the body's astonishing chemistry of love and feeling.

2020 *Poetic, confrontational and radical, Decolonizing Academia* speaks to those who have been taught to doubt themselves because of the politics of censorship, violence and silence that sustain the Ivory Tower. Clelia O. Rodríguez illustrates how academia is a racialized structure that erases the voices of people of colour, particularly women. She offers readers a gleam of hope through the voice of an inquisitorial thinker and methods of decolonial expression, including poetry, art and reflections that encompass much more than theory. In *Decolonizing Academia*, Rodríguez passes the torch to her Latinx offspring to use as a tool to not only survive academic spaces but also dismantle systems of oppression. Through personal anecdotes, creative non-fiction and unflinching bravery, Rodríguez reveals how people of colour are ignored, erased and consumed in the name of research and tenured academic positions. Her work is a survival guide for people of colour entering academia.

When Therapists Cry Aug 29

2019 When Therapists Cry addresses one of the most authentic and singularly human experiences a therapist can have in therapy: crying. While therapist crying in therapy is the explicit focus of this book, it is used as a springboard for understanding the various ways in which therapists' emotions come alive--and become visible--in the therapy room. In depth clinical examples and conceptualizations from expert contributors illustrate what the experience of therapist crying looks and feels like: why therapists cry, how crying impacts the therapist and the treatment, what therapists feel about their tears, and the many ways in which therapists may engage with their own tears in order to facilitate therapeutic progress, ensure appropriate professional conduct, and deepen their clinical work.

Why Only Humans Weep Feb 25 2022 Crying has fascinated

mankind for millenia. Since ancient times, we have known that emotional tears are a unique human characteristic. Unsurprisingly, over hundreds of years, scholars from different backgrounds have speculated about the origin and functions of human tears. According to Charles Darwin, tears fulfilled no adaptive function. And yet, this seems in sharp contrast to statements in the popular media about the significance of crying. Crying is thought to bring relief and is considered healthy - and withholding tears unhealthy. In addition, tears have been said to inhibit aggression in assaulters and to promote social bonding. Perhaps that could explain why tears have been so important in our evolution. Ad Vingerhoets is one of the few scientists in the world to have studied crying. He examines in Why only humans weep which claims about crying are scientifically tenable - which are fact and which are fiction? Though a psychologist, he doesn't just restrict himself to the current psychological literature, but also explores work in evolutionary biology, neurosciences, theology, art, history, and anthropology to provide an integrated perspective on this complex phenomenon. Written throughout in an academically accessible style, this book is groundbreaking in contributing to a modern scientific understanding of crying. It will have broad appeal to psychologists, psychiatrists, philosophers, biologists, and anthropologists.
