Memories of Asia Minor in Contemporary Greek Culture Aug 19 2019 The Greco-Turkish War (1919-1922) in Asia Minor and the Population Exchange that followed led to the forced displacement of more than 1.5 million people who became entangled in the nation-building processes of both Greece and Turkey. This book examines the memories that shaped Asia Minor refugee identity, focusing on the ways in which these memories continue to reverberate in contemporary Greek culture. It explores how memories of Asia Minor frame wider social debates, foster affective alliances, inform different notions of belonging and provide a toolkit for addressing contemporary concerns. Taking the reader across a wide range of cultural works--history textbooks, comics, theatre, documentary and fiction films, news footage and photography--the book shows how these works have become means for individuals and communities to contribute to the process of history-making. While keeping its focus on present-day Greece, *Memories of Asia Minor* joins wider global debates over contested pasts, legacies of war and refugeehood.

The Memory Book Mar 18 2022 They tell me that my memory will never be the same, that I'll start forgetting things. At first just a little, and then a lot. So I'm writing to remember. Sammie McCoy is a girl with a plan: graduate at the top of her class and get out of her small town as soon as possible. Nothing will stand in her way--not even the rare genetic disorder the doctors say will slowly steal her memories and then her health. So the memory book is born: a journal written to Sammie's future self, so she can remember everything from where she stashed her study guides to just how great it feels to have a best friend again. It's where she'll record every perfect detail of her first date with longtime-crush Stuart, a gifted young writer home for the summer. And where she'll admit how much she's missed her childhood friend Cooper, and the ridiculous lengths he will go to make her laugh. The memory book will ensure Sammie never forgets the most important parts of her life--the people who have broken her heart, those who have mended it--and most of all, that if she's going to die, she's going to die living. This moving and remarkable novel introduces an inspiring character you're sure to remember, long after the last page.

The Memory String Nov 02 2020 Each button on Laura's memory string represents a piece of her family history. The buttons Laura cherishes the most belonged to her mother—a button from her prom dress, a white one off her wedding dress, and a single small button from the nightgown she was wearing on the day she died. When the string breaks, Laura's new stepmother, Jane, is there to comfort Laura and search for a missing button, just as Laura's mother would have done. But it's not the same—Jane isn't Mom. In Eve Bunting's moving story, beautifully illustrated by Ted Rand, Laura discovers that a memory string is not just for remembering the past: it's also for recording new memories.

The Book of Memory Feb 17 2022 The story that you have asked me to tell you does not begin with the pitiful ugliness of Lloyd's death. It begins on a long-ago day in August when the sun seared my blistered face and I was nine years old and my father and mother sold me to a strange man. Memory, the narrator of Petina Gappah's *The Book of Memory*, is an albino woman languishing in Chikurubi Maximum Security Prison in Harare, Zimbabwe, after being sentenced for murder. As part of her appeal, her lawyer insists that she write down what happened as she remembers it. The death penalty is a mandatory sentence for murder, and Memory is, both literally and metaphorically, writing for her life. As her story unfolds, Memory reveals that she has been tried and convicted for the murder of Lloyd Hendricks, her adopted father. But who was Lloyd Hendricks? Why does Memory feel no remorse for his death? And did everything happen exactly as she remembers? Moving between the townships of the poor and the suburbs of the rich, and between past and present, the 2009 Guardian First Book Award-winning writer Petina Gappah weaves a compelling tale of love, obsession, the relentlessness of fate, and the treachery of memory.

Commonwealth Writers' Prize for Best Book As a decade of civil war and political unrest comes to a devastating close, three men must reconcile themselves to their own fate and the fate of their broken nation. For Elias Cole, this means reflecting on his time as a young scholar in 1969 and the affair that defined his life. For Adrian Lockheart, it means listening to Elias's tale and following his own heart into a heated romance. For Elias's doctor, Kai Mansaray, it's desperately battling his nightmares by trying to heal his patients. As each man's story becomes inexorably bound with the others', they discover that they are connected not only by their shared heritage, pain, and shame, but also by one remarkable woman. The Memory of Love is a beautiful and ambitious exploration of the influence history can have on generations, and the shared cultural burdens that each of us inevitably face. Memories of the Future Nov 14 2021 Longlisted for the 2020 Andrew Carnegie Medals for Excellence A provocative, exuberant novel about time, memory, desire, and the imagination from the internationally bestselling and prizewinning author of *The Blazing World*, *Memories of the Future* tells the story of a young Midwestern woman's first year in New York City in the late 1970s and her obsession with her mysterious neighbor, Lucy Brite. As she listens to Lucy through the thin walls of her dilapidated building, S.H., aka "Minnesota," transcribes her neighbor's bizarre and increasingly ominous monologues in a notebook, along with sundry other adventures, until one frightening night when Lucy bursts into her apartment on a rescue mission. Forty years later, S.H., now a veteran author, discovers her old notebook, as well as early drafts of a never-completed novel while moving her aging mother from one facility to another. Ingeniously juxtaposing the various texts, S.H. measures what she remembers against what she wrote that year and has since forgotten to create a dialogue between selves across decades. The encounter both collapses time and reframes its meanings in the present. Elaborately structured, intellectually rigorous, urgently paced, poignant, and often wildly funny, *Memories of the Future* brings together themes that have made Hustvedt among the most celebrated novelists working today: the fallibility of memory; gender mutability; the violence of patriarchy; the vagaries of perception; the ambiguous borders between sensation and thought, sanity and madness; and our dependence on primal drives such as sex, love, hunger, and rage.

The Art of Making Memories Jul 18 2019 What's the actual secret to happiness? Great memories! Meik Wiking—happiness researcher and New York Times bestselling author of *The Little Book of Hygge* and *The Little Book of Lykke*—shows us how to create memories that make life sweet in this charming book. Do you remember your first kiss? The day you graduated? Your favorite vacation? Or the best meal you ever had? Memories are the cornerstones of our identity, shaping who we are, how we act, and how we feel. In his work as a happiness researcher, Meik Wiking has learned that people are happier if they hold a positive, nostalgic view of the past. But how do we make and keep the memories that bring us lasting joy? *The Art of Making Memories* examines how mental images are made, stored, and recalled in our brains, as well as the "art of letting go"—why we tend to forget certain moments to make room for deeper, more meaningful ones. Meik uses data, interviews, global surveys, and real-life experiments to explain the nuances of nostalgia and the different ways we form memories around our experiences and recall them—revealing the power that a "first time" has on our recollections, and why a piece of music, a smell, or a taste can unexpectedly conjure a moment from the past. Ultimately, Meik shows how we each can create warm memories that will stay with us for years. Combining his signature charm with Scandinavian forthrightness, filled with infographics, illustrations, and photographs, and featuring "Happy Memory Tips," *The Art of Making Memories* is an inspiration meditation and practical handbook filled with ideas to help us make the memories that will bring us joy throughout our lives.

The Writer's Book of Memory Apr 26 2020 Memory has long been ignored by rhetoricians because the written word has made memorization virtually obsolete. Recently however, as part of a revival of interest in classical rhetoric, scholars have begun to realize that memory offers vast possibilities for today's writers. Synthesizing research from rhetoric, psychology, philosophy, and literary and composition studies, this volume brings together many historical and contemporary theories of memory. Yet its focus is clear: memory is a generator of knowledge and a creative force which deserves attention at the beginning of and throughout the writing process. This volume emphasizes the importance of recognizing memory's powers in an age in which mass media influence us all and electronic communication changes the way we think and write. It also addresses the importance of the individual memory and voice in an age which promotes conformity. Written in a strong, lively personal manner, the book covers a great deal of scholarly material. It is never overbearing, and the extensive bibliography offers rich vistas for further study.

Adventures in Memory Nov 21 2019 A novelist and a neuroscientist uncover the secrets of human memory. What makes us remember? Why do we forget? And what, exactly, is a memory? With playfulness and intelligence, *Adventures in Memory* answers these questions and more, offering an illuminating look at one of our most fascinating faculties. The authors—two Norwegian sisters, one a neuropsychologist and the other an acclaimed writer—skillfully interweave history, research, and exceptional personal stories, taking readers on a captivating exploration of the evolving understanding of the science of memory from the Renaissance discovery of the hippocampus—named after the seahorse it resembles—up to the present day. Mixing metaphor with meta-analysis, they embark on an incredible journey: "diving for seahorses" for a memory experiment in Oslo fjord, racing taxis through London, and "time-traveling" to the future to reveal thought-provoking insights into remembering and forgetting. Along the way they interview experts of all stripes, from the world's top neuroscientists to famous novelists, to help explain how memory works, why it sometimes fails, and what we can do to improve it. Filled with cutting-edge research and nimble storytelling, the result is a charming—and memorable—adventure through human memory.

The Memory Illusion Apr 07 2021 THE INTERNATIONAL BESTSELLER "Truly fascinating." Steve Wright, BBC Radio 2 - Have you ever forgotten the name of someone you've met dozens of times? - Or discovered that your memory of an important event was completely different from everyone else's? - Or vividly recalled being in a particular place at a particular time, only to discover later that you couldn't possibly have been? We rely on our memories every day of our lives. They make us who we are. And yet the truth is, they are far from being the accurate record of the past we like to think they are. In *The Memory Illusion*, forensic psychologist and memory expert Dr Julia Shaw draws on the latest research to show why our memories so often play tricks on us – and how, if we understand their fallibility, we can actually improve their accuracy. The result is an exploration of our minds that both fascinating and unnerving, and that will make you question how much you can ever truly know about yourself. Think you have a good memory? Think again. 'A spryly paced, fun, sometimes frightening exploration of how we remember – and why everyone remembers things that never truly happened.' Pacific Standard

Cultural Memories Sep 12 2021 The revival of interest in collective cultural memories since the 1980s has been a genuinely global phenomenon. Cultural memories can be defined as the social constructions of the past that allow individuals and groups to orient themselves in time and space. The investigation of cultural memories has necessitated an interdisciplinary perspective, though geographical questions about the spaces, places, and landscapes of memory have acquired a special significance. The essays in this volume, written by leading anthropologists, geographers, historians, and psychologists, open a range of new interpretations of the formation and development of cultural memories from ancient times to the present day. The volume is divided into five interconnected sections. The first section outlines the theoretical considerations that have shaped recent debates about cultural memory.

The second section provides detailed case studies of three key themes: the founding myths of the nation-state, the contestation of national collective memories during periods of civil war, and the oral traditions that move beyond national narrative. The third section examines the role of World War II as a pivotal episode in an emerging European cultural memory. The fourth section focuses on cultural memories in postcolonial contexts beyond Europe. The fifth and final section extends the study of cultural memory back into premodern tribal and nomadic societies.

The Seven Sins of Memory Jan 04 2021 A New York Times Notable Book: A psychologist's "gripping and thought-provoking" look at how and why our brains sometimes fail us (Steven Pinker, author of *How the Mind Works*). In this intriguing study, Harvard psychologist Daniel L. Schacter explores the memory miscues that occur in everyday life, placing them into seven categories: absent-mindedness, transience, blocking, misattribution, suggestibility, bias, and persistence. Illustrating these concepts with vivid examples—case studies, literary excerpts, experimental evidence, and accounts of highly visible news events such as the O. J. Simpson verdict, Bill Clinton's grand jury testimony, and the search for the Oklahoma City bomber—he also delves into striking new scientific research, giving us a glimpse of the fascinating neurology of memory and offering “insight into common malfunctions of the mind” (USA Today). “Though memory failure can amount to little more than a mild annoyance, the consequences of misattribution in eyewitness testimony can be devastating, as can the consequences of suggestibility among pre-school children and among adults with ‘false memory syndrome’ . . . Drawing upon recent neuroimaging research that allows a glimpse of the brain as it learns and remembers, Schacter guides his readers on a fascinating journey of the human mind.” —Library Journal “Clear, entertaining and provocative . . . Encourages a new appreciation of the complexity and fragility of memory.” —The Seattle Times “Should be required reading for police, lawyers, psychologists, and anyone else who wants to understand how memory can go terribly wrong.” —The Atlanta Journal-Constitution “A fascinating journey through paths of memory, its open avenues and blind alleys . . . Lucid, engaging, and enjoyable.” —Jerome Groopman, MD “Compelling in its science and its probing examination of everyday life, *The Seven Sins of Memory* is also a delightful book, lively and clear.” —Chicago Tribune Winner of the William James Book Award
