**A Dog's Book of Truths** Nov 05 2022 LuLu and Maxie are sisters, two dogs who've become an artistic passion for photographer Nancy LeVine. For nearly a decade, she's chronicled their lives and, in the process, opened a window into the relationship between canines and their world and what dogs can teach us about ourselves. In **A Dog's Book of Truths**, LeVine pairs her stunning duotone images with the insightful words of poet Joseph Duemer. The results range from humorous to profound. As one dog looks purposefully into the camera: "Some dogs are comic geniuses precisely because they take the world so seriously." Another dog, alone on a subway train: "To lose a dog's trust is to fail the soul." When several dogs tussle over a stick: "A dog will run in circles or chase sticks endlessly not out of mindlessness but from energy and delight in her existence." Throughout the pages of **A Dog's Book of Truths**, LeVine's photos resonate with clear glimpses at those unself-conscious moments that transcend superficiality and artifice. Dog lovers will relish this book for its honesty and verve, while photography lovers will find its images unparalleled

takes on dogs at their most natural. Everyone else will find the philosophical union between dog and human a most compelling subject. A Dog's Book of Truths is a must-have volume for everyone interested in more fully exploring the mysteries of life.

*Alternative Truths* Jul 21 2021 "A look at post-election America that is, or will be, or could be" --Editors' foreword.

*These Truths: A History of the United States* Oct 04 2022 New York Times Bestseller In the most ambitious one-volume American history in decades, award-winning historian and New Yorker writer Jill Lepore offers a magisterial account of the origins and rise of a divided nation, an urgently needed reckoning with the beauty and tragedy of American history. Written in elegiac prose, Lepore's groundbreaking investigation places truth itself—a devotion to facts, proof, and evidence—at the center of the nation's history. The American experiment rests on three ideas—"these truths," Jefferson called them—political equality, natural rights, and the sovereignty of the people. And it rests, too, on a fearless dedication to inquiry, Lepore argues, because self-government depends on it. But has the nation, and democracy itself, delivered on that promise? *These Truths* tells this uniquely American story, beginning in 1492, asking whether the course of events over more than five centuries has proven the nation's truths, or belied them. To answer that question, Lepore traces the intertwined histories of American politics, law, journalism, and technology, from the colonial town meeting to the nineteenth-century party machine, from talk radio to twenty-first-century Internet polls, from Magna Carta to the Patriot Act, from the printing press to Facebook News. Along the way, Lepore's sovereign chronicle is filled with arresting sketches of both well-known and lesser-known Americans, from a parade of presidents and a rogues' gallery of political mischief makers to the intrepid leaders of protest movements, including Frederick Douglass, the famed abolitionist orator; William Jennings Bryan, the three-time presidential candidate and ultimately tragic populist; Pauli Murray, the visionary civil rights strategist; and Phyllis Schlafly, the uncredited architect of modern conservatism. Americans are descended from slaves and slave owners, from conquerors and the conquered, from immigrants and from people who have fought to end immigration. "A nation born in contradiction will fight forever over the meaning of its history," Lepore writes, but engaging in that struggle by studying the past is part of the work of citizenship. "The past is an inheritance, a gift and a burden," *These Truths* observes. "It can't be shirked. There's nothing for it but to get to know it."

**10 Truths About Leadership** Sep 10 2020 Many leaders remember those life-changing moments when it suddenly became crystal clear what had to be done to reach their organizations' goals. It wasn't until Pete Luongo was faced with that one epiphany in his life, a difficult period that required him to rebalance life's priorities and bring a new understanding to his work, that he recognized that all results are based upon behaviors appropriate to the circumstances. Through this understanding — that actions are determined by specific, well-defined standards — he developed a model for success, one that is both sustainable and that allows people to retain their personal dignity as they pursue their life plans. In this book, Luongo illuminates the ten most common obstacles to success and pairs them with the ageless principles that help readers overcome them. His straightforward advice, based on data and hard-won experience, provides an understandable and virtually guaranteed plan for improvement and achievement.

Foreword Magazine Why do flying machines and astronauts appear in the artworks and sacred texts of all ancient cultures? **Truth's Table** Dec 02 2019 A collection of essays and stories documenting the lived theology and spirituality we need to hear in order to lean into a more freeing, loving, and liberating faith—from the hosts of the beloved Truth's Table podcast "The liberating work of Truth's Table creates breathing room to finally have those conversations we've been needing to have."—Morgan Harper Nichols, artist and poet Once upon a time, an activist, a theologian, and a psychologist walked into a group chat. Everything was laid out on the table: Dating. Politics. The Black church. Pop culture. Soon, other Black women began pulling up chairs to gather round. And so, the Truth's Table podcast was born. In their literary debut, co-hosts Christina Edmondson, Michelle Higgins, and Ekemini Uwan offer stories by Black women and for Black women examining theology, politics, race, culture, and gender matters through a Christian lens. For anyone seeking to explore the spiritual dimensions of hot-button issues within the church, or anyone thirsty to deepen their faith, Truth's Table provides exactly the survival guide we need, including: • Michelle Higgins's unforgettable treatise revealing the way "racial reconciliation" is a spiritually bankrupt,

empty promise that can often drain us of the ability to do real justice work • Ekemini Uwan's exploration of Blackness as the image of God in the past, present, and future • Christina Edmondson's reimagination of what a more just and liberating form of church discipline might look like—one that acknowledges and speaks to the trauma in the room These essays deliver a compelling theological re-education and pair the spiritual formation and political education necessary for Black women of faith.

The Book of Hard Truths Sep 30 2019 Uncertainty. Vulnerability. Death. Hard Truths have a secret power over us: We'd rather ignore them. It catalogues some of the most universally known but universally resisted Hard Truths in a fun and non-threatening format. *A Conspiracy of Truths* Dec 14 2020 A wrongfully imprisoned storyteller spins stories from his jail cell that just might have the power to save him—and take down a corrupt government. Arrested on accusations of witchcraft and treason, Chant finds himself trapped in a cold, filthy jail cell in a foreign land. With only his advocate, the unhelpful and uninterested Consanza, he quickly finds himself cast as a bargaining chip in a brewing battle between the five rulers of this small, backwards, and petty nation. Or, at least, that's how he would tell the story. In truth, Chant has little idea of what is happening outside the walls of his cell, but he must quickly start to unravel the puzzle of his imprisonment before they execute him for his alleged crimes. But Chant is no witch—he is a member of a rare and obscure order of wandering storytellers. With no country to call his home, and no people to claim as his own, all Chant has is his wits and his apprentice, a lad more interested in wooing handsome shepherds than learning the ways of the world. And yet, he has one great power: his stories in the ears of the rulers determined to prosecute him for betraying a nation he knows next to nothing about. The tales he tells will topple the Queens of Nuryevet and just maybe, save his life.

**A Short History of Truth** Sep 22 2021 How did we find ourselves in a "post-truth" world of "alternative facts"? And can we get out of it? *A Short History of Truth* sets out to answer these questions by looking at the complex history of truth and falsehood. It identifies ten types of supposed truth and explains how easily each can become the midwife of falsehood. There is no species of truth that we can rely on unquestioningly, but that does not mean the truth can never be established. Attaining truth is an achievement we need to work for, and each chapter will end up with a truth we can have some confidence in. This history builds into a comprehensive and clear explanation of why truth is now so disputed by exploring 10 kinds of truth: 1. Eternal truths. 2. Authoritative truths. 3. Esoteric truths. 4. Reasoned truths. 5. Evidence-based truths. 6. Creative truths. 7. Relative truths. 8. Powerful truths 9. Moral truths. 10. Holistic truths. Baggini provides us with all we need to restore faith in the value and possibility of truth as a social enterprise. **The Problem of Two Truths in Buddhism and Vedānta** Mar 05 2020 It would be a bulky and intricate volume indeed that treated adequately of the problem of two truths in Buddhism and Vedānta: the present volume is slim and unpretentious. Not the less incisive, for that, it is hoped, but certainly neither systematic nor complete, and this in several senses. Not all schools of Buddhism are dealt with: Theravada, Indian Yogācāra, and the Logicians are missing among the Indian schools and there is no reference to Chinese and Japanese Buddhism. The Vedānta discussed is only Advaita (non-dualist), and that virtually limited to Sāṅkara. Nor does the volume as a whole take up the problem of two truths thematically, though each paper raises the philosophical questions its author thinks appropriate. The title 'The Problem of Two Truths in Buddhism and Vedānta' promises more than the book itself contains. The reason for this is given in the prefatory 'Note': each chapter is a paper read and discussed at a working conference. All the papers from the conference are here published, and no others. The book has thus the contours dictated by the availability of scholars at the time of the conference.

*Gandhi's Truths in an Age of Fundamentalism and Nationalism* Mar 29 2022 The twenty-first century has seen violence thunder back onto the stage of history. Religious, political, social, cultural, and economic constituents and interests thus contribute to the local and global manifestations of violence in our interconnected and contracting global world. Firmly embedded within the field of religion, the authors of this volume concede that religious motifs and impulses are alive and well in this unfolding of bloodshed. It is no wonder then that in our volatile historical age, religious fundamentalism and illiberal nationalism have emerged as dominant contemporary movements. Against this backdrop, the contributors to this edited book look back in order to move forward by reflecting upon the truth-force (Satyagraha) that grounded and guided Mohandas Karamchand Gandhi (1869-1948). On the heels of several commemorations in 2019 of the 150th anniversary of Gandhi's birth, we reexamine the truths of his philosophy and nonviolent strategy to resist religious and political fundamentalisms. Embracing truth was, for Gandhi, the only way to achieve complete freedom (poorna Swaraj). The goal of freedom, which Gandhi conceptualized as profoundly personal, expansively communitarian, and organically ecological, emanates from a firm grasp of truth.

**Saving Truth From Paradox** Jul 09 2020 Saving Truth from Paradox is an ambitious investigation into paradoxes of truth and related issues, with occasional forays into notions such as vagueness, the nature of validity, and the Gödel incompleteness theorems. Hartry Field presents a new approach to the paradoxes and provides a systematic and detailed account of the main competing approaches. Part One examines Tarski's, Kripke's, and Lukasiewicz's theories of truth, and discusses validity and soundness, and vagueness. Part Two considers a wide range of attempts to resolve the paradoxes within classical logic. In Part Three Field turns to non-classical theories of truth that restrict excluded middle. He shows that there are theories of this sort in which the conditionals obey many of the classical laws, and that all the semantic paradoxes (not just the simplest ones) can be handled consistently with the naive theory of truth. In Part Four, these theories are extended to the property-theoretic paradoxes and to various other paradoxes, and some issues about the understanding of the notion of validity are addressed. Extended paradoxes, involving the notion of determinate truth, are treated very thoroughly, and a number of different arguments that the theories lead to "revenge problems" are addressed. Finally, Part Five deals with dialethic approaches to the paradoxes: approaches which, instead of restricting excluded middle, accept certain contradictions but alter classical logic so as to keep them confined to a relatively remote part of the language. Advocates of dialethic theories have argued them to be better than theories that restrict excluded middle, for instance over issues related to the incompleteness theorems and in avoiding revenge problems. Field argues that dialetheists' claims on behalf of their theories are quite unfounded, and indeed that on some of these issues all current versions of dialetheism do substantially worse than the best theories that restrict excluded middle.
