**Access to Justice** Jul 26 2019 Building on a series of ESRC funded seminars, this edited collection of expert papers by academics and practitioners is concerned with access to civil and administrative justice in constitutional democracies, where, for the past decade governments have reassessed their priorities for funding legal services: embracing 'new technologies' that reconfigure the delivery and very concept of legal services; cutting legal aid budgets; and introducing putative cost-cutting measures for the administration of courts, tribunals and established systems for the delivery of legal advice and assistance. Without underplaying the future potential of technological innovation, or the need for a fair and rational system for the prioritisation and funding of legal services, the book questions whether the absolutist approach to the dictates of austerity and the promise of new technologies that have driven the Coalition Government's policy, can be squared with obligations to protect the fundamental right of access to justice, in the unwritten constitution of the United Kingdom.

**Cpt And Lorentz Symmetry - Proceedings Of The Third Meeting** Dec 11 2020 Lorentz and CPT invariance is a feature of the Standard Model of particle physics and of theories of gravity such as Einstein's general relativity. However, an underlying theory such as strings may introduce small violations of Lorentz and CPT symmetry. This book consists of reviews from about 50 experts in the field, covering theoretical and experimental studies of these relativity-violating effects. It comprises the Proceedings of the Third Meeting on CPT and Lorentz Symmetry, held at Indiana University in Bloomington. The Meeting focused on recent developments involving fundamental spacetime symmetries and included theoretical scenarios and experimental searches for possible relativity violations. Experimental subjects covered include resonant-cavity and interferometric behavior of photons, oscillations of neutrinos and neutral mesons, clock-comparison measurements on the Earth and in space, astrophysical observations, tests with macroscopic matter, spectroscopy of hydrogen and antihydrogen, studies of particle properties and behavior, and gravitational tests. Theoretical topics covered include physical effects at the level of the Standard Model and beyond, the possible origins and mechanisms for Lorentz and CPT violations, and associated issues in particle physics, field theory, gravity, and string theory.

**A User's Guide to Principal Components** Nov 02 2022 WILEY-INTERSCIENCE PAPERBACK SERIES The Wiley-Interscience Paperback Series consists of selected books that have been made more accessible to consumers in an effort to increase global appeal and general circulation. With these new unabridged softcover volumes, Wiley hopes to extend the lives of these works by making them available to future generations of statisticians, mathematicians, and scientists. From the Reviews of A User's Guide to Principal Components "The book is aptly and correctly named—A User's Guide. It is the kind of book that a user at any level, novice or skilled practitioner, would want to have at hand for autotutorial, for refresher, or as a general-purpose guide through the maze of modern PCA." –Technometrics "I recommend A User's Guide to Principal Components to anyone who is running multivariate analyses, or who contemplates performing such analyses. Those who write their own software will find the book helpful in designing better programs. Those who use off-the-shelf software will find it invaluable in interpreting the results." –Mathematical Geology

**Public Law Adjudication in Common Law Systems** Apr 02 2020 This volume arises from the inaugural Public Law Conference hosted in September 2014 by the Centre for Public Law at the University of Cambridge, which brought together leading public lawyers from a number of common law jurisdictions. While those from such jurisdictions share background understandings, significant differences within the common law world create opportunities for valuable exchanges of ideas and debate. This collection draws upon one of the principal sub-themes that emerged during the conference – namely, the way in which relationships and distinctions between the notions of 'process' and 'substance' play out in relation to and inform adjudication in public law cases. The essays contained in this volume address those issues from a variety of perspectives. While the bulk of the chapters consider topical issues in judicial review, either on common law or human rights grounds, or both, other chapters adopt more theoretical, historical, empirical or contextual approaches. Concluding chapters reflect generally on the papers in the collection and the value of facilitating cross-jurisdictional dialogue.
